Senior secondary and Higher Secondary
Completed in 2021
- Freshworks STS software academy
Full stack web development
Completed in 2023

Language

- Tamil
- English

About Me

I am Inba Lokesh from Chennai. I have completed my class 12 from Pon Vidyashram group of CBSE schools. My mother is a former computer teacher and my father has a computer and typewriting institute. I am a passionate learner. I enjoy drawing and solving puzzles. I would like to work at a place where I learn interesting things and continue to grow as a professional. Due to financial issues I couldn't continue my higher education. However, I learnt the basics of photography and Python on Udemy and Youtube while working with my neighbor who is an artist. I got to know about Freshworks STS software academy and applied for it as it aligned with my interest and made it affordable. I hoped to learn, develop as a professional and support my family. In the past year I have learnt HTML, CSS, Javascript, Java and MySql. I am good at designing and coding. I am also a collaborative person. My goal is to solve complex problems through the work I do.

Project

Only Home Food

(HTML, CSS, JavaScript, java, MySql)

Problem Statement

Many students, working professionals, and individuals who work away from home or travel often have limited food options, primarily resorting to unhealthy hotel meals. Therefore, my website aims to offer cost-effective, nutritious home-cooked meals prepared by experienced individuals, particularly mothers, and deliver them to your doorstep.

Features.

- User Registration and Profiles
- Search And Menu
- Order Management System
- Order History and Reordering
- Location-Based Services
- Responsive Design and Cross-Platform Compatibility

Certs

- Certificate on basic of SQL ([Hackerrank](#))
- Certificate on basic of Python ([Guvi](#))
- Certificate on AI 2.0 India ([Guvi](#))
